DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 20 July 2005 has been entered.

Allowable Subject Matter

2. The indicated allowability of claims 6 and 11-12 is withdrawn in view of the newly discovered reference(s). Rejections based on the newly cited reference(s) follow. Any inconvenience caused by this late notice is regretted.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1-3, it is not clear what structure is set forth by "said line of action of said tool being substantially perpendicular to the work piece". The work piece is not part of the invention.

In claims 1-2, line 10, it is not clear what element "the apparatus" is referring back to.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-12, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Walton, II (US 4,238,884).

Walton discloses all the recited elements of the invention including a pivoting reciprocating working member (86), a body (24), a support (94), and a mount (at 96). Regarding claim 9, a motor (10) and first drive means (Figure 2). Regarding claim 7, a first part (at 96) and a second part (elements connected to the element 96 are adapted to be connected to the element 86 via several parts which undergo reciprocating movement relative to the element 96). Regarding claims 10-12, second drive means comprising cam means (col. 5, lines 3-62).

7. Claims 1- 7 and 9, as best understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Gerber (US 6,131,498).

Gerber discloses all the recited elements of the invention including a pivoting reciprocating working member (44), a body (32), a support (40), and a mount (36). Regarding claims 4-7, see Figure 2. Regarding claim 9, a motor (50) and first drive means (52).

Response to Arguments

8. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
